

LA488 GAS CUTTING NOZZLE

Built in adjustments are provided to allow for the centering of the cutting tip as well as clearance above the part surface. In order to simplify maintenance, replacement of the protective glass is accomplished without disturbing these adjustments. The assembly is constructed to fit the 1-7/8-20 threaded lower portion of the fine focus head. The tip has been aerodynamically designed to provide maximum coaxial flow of high pressure gas to assist in drilling or cutting material.

LA488 GAS CUTTING NOZZLE FEATURES:

- * Narrow profile allows part incidence angles as acute as 75°
- * Copper Cutting Tip
- * Aluminum Welding Tip
- * Anodized Aluminum, Stainless Steel & Copper Construction
- * Protective Cover Glass Protects Focus Lens

ITEM#	DESCRIPTION	PART #
1	Coupling Ring	G113214
2	Thumbscrew	ESL 64955
3	X-Y Ring	G 113215
4	Cover Glass	G 113285
5	O-Ring	AS568-024
6	Barrel	G 113216
7	Cutting Nozzle	G 113217P1
8	Welding Nozzle	G 113217P2
